

EPALLAPALLY SAINATH REDDY

Hyderabad, India | +91 7013838483 | sainath2513@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Computer Science Engineering graduate with hands-on experience coding, testing, and debugging software across Python, Java, C, and C++. Built and shipped end-to-end systems spanning REST API backends, relational databases, and machine learning pipelines, including a model reaching 94% diagnostic accuracy on 8,000+ image records. Comfortable working with Data Structures and Algorithms, Object-Oriented Programming, DBMS, and Git-based version control within collaborative development workflows.

Technical Skills

Programming Languages: Python, Java, JavaScript, C, C++
Frontend: React.js, HTML, CSS
Backend: Flask, REST APIs
Databases: MySQL, SQL
AI/ML: TensorFlow, Keras, OpenCV, Pandas, NumPy
Tools: Git, GitHub, VS Code, Linux, Microsoft Azure
Professional Skills: Problem Solving, Critical Thinking, Team Work, Fast Learner, Adaptability, Creativity

Education

B.Tech in Computer Science Engineering	2022 – 2026
Anurag University, Hyderabad	CGPA: 8.24/10

Projects

Breast Cancer Image Classification Using Deep Transfer Learning *Jan 2026 – Mar 2026*

Tech Stack: Python, TensorFlow, Keras, OpenCV, Flask

- Built a deep learning image classification pipeline achieving **94% accuracy** on 8,000+ labeled images
- Deployed the trained model via a **Flask REST API** for real-time prediction, with integrated preprocessing and augmentation
- Ran full preprocessing, training, and validation cycles, improving data quality and reducing training-set inconsistencies
- Documented the complete workflow for reproducibility — data prep, architecture, testing, and API integration

Emotion Classification from Facial Images *Sep 2025 – Nov 2025*

Tech Stack: Python, TensorFlow, Keras, ResNet-50

- Built a facial emotion recognition system using **ResNet-50** on the RAF-DB dataset (10,000+ images, 7 emotion classes)
- Achieved **85.5% accuracy**; built and tested Flask REST APIs for real-time emotion prediction
- Evaluated performance using standard ML metrics, improving reliability through systematic testing and debugging

E-Commerce Web Application *Feb 2025 – Mar 2025*

Tech Stack: Java (Servlets, JSP, JDBC), MySQL, Bootstrap, HTML, CSS

- Built a full-stack e-commerce platform with authentication, product catalog, cart, and category-based search
- Integrated demo payment flow and automated email notifications for signup, orders, stock alerts, and delivery updates
- Built an admin panel for product CRUD, inventory management, and order tracking

Certifications & Achievements

- Microsoft Azure AI Fundamentals
- Salesforce Agentforce Specialist
- Java Full Stack – Wipro TalentNext
- Java Programming – Infosys Springboard
- Cybersecurity & Networking – Cisco Networking Academy
- 5-Star Gold Badge in Problem Solving – HackerRank
- Event Management Club member
